ADVANCED AIRPORT OPERATIONS MANAGEMENT
Premium Best Practice Training and Networking

12-16 June 2017

COURSE PROGRAMME

1/ Modern Operational Airport Management:
- ↗ IT & Equipment
- ↗ Staff Training

2/ A-CDM (Airport Collaborative Decision Making)
- ↗ Recognize the benefits from the implementation of A-CDM

3/ Facilitations of ICAO & IATA
- ↗ Swift efficient pax and bag processing
- ↗ Accessible safe facilities & services
- ↗ Balancing efficiency and security

4/ Slot Allocation & Coordination:
- ↗ Demand & capacity management
- ↗ Modelling airport capacity
- ↗ Effective Slot allocation principles
- ↗ Improving slot performance

5/ Management of Airfield Aircraft movement:
- ↗ Handling special apron equipment
- ↗ Norms and standards for planning Aircraft & Spec. Equipment movement. Management and operational procedures.
- ↗ Organization of aircraft taxi routes and parking areas.

6/ Airfield Aircraft Servicing:
- ↗ Aircraft servicing order using special apron equipment
- ↗ Special apron equipment maintenance
- ↗ Loading control

7/ Emergency Situations Management:
- ↗ Order to ensure the safety of flights and movement
- ↗ Risks Identification and analysis
- ↗ Identifying risk and investigation of aircraft damages

8/ Modelling airport work:
- ↗ Forecasting potential errors
- ↗ Emergency Planning
- ↗ Emergency Testing

9/ Optimising Airport Congestion:
- ↗ Increasing Operations during congestion
- ↗ Emergency Reaction
- ↗ Managing Scarce Airport Capacity
- ↗ Airport Security and Safety

COURSE SPECIALS

- ↗ IATA and ICAO instructors, London Airport Experts
- ↗ London Airport Airside Visits
- ↗ Networking Receptions with British Aviation Suppliers
- ↗ Live Case Scenarios and Video Presentations
- ↗ Exclusive Hospitality
- ↗ Examination & Certificate Award
