ADVANCED GROUND HANDLING MANAGEMENT 2017
23-27 October 2017
Central London

Best practice & networking training focuses on all ground handling functions: from marshalling to pushback & from check-in to de-icing, covering all operational aspects to perform quick turnarounds and minimize delays.

This is an essential training to gain practical insights into station control, efficiency and safety of all ground operations. Benefits include the latest updates on how to improve the On-Time Performance as well as Ramp Management Efficiency, especially designed for airport, self-handling airlines, handling agents, station managers, ground service providers and CAAs.

Top Expert Speakers include IATA, Eurocontrol, ANSP Airports Operator, London Airports among others. Essential part is the practical ground handling tour of London airport as well as the Emergency and Crisis Centre visits.
